

# Energy Storage Systems Market & main trends

Octobre 2024 – 5<sup>th</sup> Edition

## Table of Contents

(172 ppt slides on pdf)

- Avicenne Energy profile.....3**
- Energy Storage Systems 2015-2023 & Main Drivers.....9**
  - Energy Storage Systems changing market drivers
  - Total battery market Worldwide in US\$Bn 2016-2023
  - The Worldwide battery market in 2023 by application & by chemistry
- Battery market demand forecasts 2024-2030.....18**
  - Li-ion & lead Acid 2015-2023
  - Stationary applications – ESS market & forecast in MWh 2015-2030
  - Stationary applications – ESS market & forecasts – Residential 2015-2030
  - Stationary applications – ESS market & forecasts – Grid 2015-2030
  - Grid-scale ESS: Lead Acid is facing a number of challenges
  - Stationary applications - Energy Storage Systems market: UPS, Telecom & ESS – Grid & Residential
  - Energy Storage Systems market synthesis: UPS, Telecom & ESS – Grid & Residential
  - Worldwide battery market forecast: Li-ion, Lead Acid, Na-ion & others
- Energy Storage Applications.....32**
  - Power generation system
  - Stationary Energy Storage System market segmentation
  - Regulation services, Arbitrage services, Back Up and Reserve services, Black start storage, Grid independent power services...
  - ESS market requirements
  - Technical solutions
  - Battery ESS Cost Forecasts in US
  - System Cost, TCO, Availability and Warranty are all considerations
- Global storage - Drivers and Applications.....62**
  - Global Energy Storage Systems
  - Energy Storage Global Energy Storage Market Map
  - Global Energy Storage Economics
  - Stationary: Telecom Market
  - Battery demand for Telecom - World
  - Stationary: UPS Market
  - Battery demand for UPS - World

- Europe:
  - Energy Storage Drivers
  - Energy Storage - Technical and Economics
  - Energy System
  - Grid and Storage Economics
  - Grid Organizations
  - Major Providers
  - Potential subsidies
  - Impact of Regulations – CO2 border taxes
  - Impact of Regulations - Europe/UK – rules of origin
  - Battery demand for Telecom
  - Battery demand for UPS
  - France Energy Storage Drivers
  - Germany Energy Storage Drivers
  - Italy Energy Storage Drivers
  - United Kingdom Energy Storage
  - Baltic Region Energy Storage Drivers
  - Nordic Region Energy Storage Drivers
- North America:
  - Energy Storage System Drivers
  - Technical and Economics
  - Energy System
  - Major Providers
  - Canada:
    - Technical and Economics
    - Battery and Electro-Mechanical Major Storage Projects
    - Battery and Electro-Mechanical and Electro-Chemical Proven System
  - Mexico:
    - Power Generation, Renewables and Reducing Costs
    - Energy Storage - Battery and Electro-Mechanical Major Storage Projects
  - United States:
    - Power Generation & Storage Drivers
    - Power Generation – Rate of Change is Increasing and including Battery Storage
    - Competitive Wholesale Electricity Markets in North America
    - Market Pricing of Wholesale Electricity
    - Energy Accounts for Majority of Total Wholesale Market Price
    - Average Wholesale Energy Prices in Selected U.S. Regions
    - Capacity Reserve Margins Across the U.S.
    - Worsening “Duck Curve” Phenomenon With More PV Additions
    - Energy Storage Helps Alleviate Duck Curve
    - Possible Revenue Streams for Energy Storage Assets
    - ROIs for Illustrative Battery Energy Storage Projects
    - California Energy Storage Revenues Also ~US\$0.5 Billion in 2023
    - ESS – Grid Storage Economics – Summary
    - Regulatory and Incentives
    - Impact of Regulations in the USA – Inflation Reduction Act
    - Geopolitical context in the USA - Impact of regulations - Local supply chain
    - NREL Projections for Energy Storage Systems
    - Residential Energy Storage Incentives
    - Total Installed Capacity – Leading States
    - Total Installed Capacity – Will nearly triple in the next 2 years
    - Grid Scale Battery Storage Project are getting larger
    - 11 States have established Energy Storage Procurement Targets
    - Largest Battery Energy Storage Sites
    - Procurement Targets Benefits and Demonstration Programs
    - Battery ESS Deployments

- Solar with Storage Driving Residential Energy Storage
- Electrochemical - Mature Technology with limited market success - Rebirth? - NaS and Flow Batteries – Not new, but stronger market companies are trying to create growth
- Electrochemical - Emerging Technology with demonstration programs - Na-Ion and Solid-State Batteries – new but unproven on durability, cost and creating value
- Electrochemical - Emerging Technology with demonstration programs - Fe-air and Ni-Zn Batteries – new but unproven on durability, cost and creating value
- Electrochemical - Emerging Technology with demonstration programs - Zn Based – multiple technologies and new but unproven on durability, cost and creating value
- Mechanical - Emerging Technology with demonstration programs - Gravity devices are seeing demonstration deployments
- Thermal - Emerging Technology with demonstration programs - Thermal devices are seeing demonstration deployments
- Australia:
  - Power Generation, Batteries and Costs
  - Energy System
- Asia:
  - Power Generation, Population Growth and Improved Electrification Rates
  - Asia-Pacific Energy
- Japan:
  - Power Generation, Carbon Neutrality and Back Up
  - Japan Energy Storage - METI Ministry of Economy, Trade and Industry inks Storage Strategy with economic targets
  - Japan Energy Storage - Battery and Electro-Mechanical Major Storage Projects
- China:
  - Power Generation, Mandates and Large Power Users
  - Energy Storage - Technical and Economics
  - Energy Storage - Battery and Electro-Mechanical Major Storage Projects
  - Electro-Mechanical Proven System - Compressed Air – Proven System still in limited applications
  - Thermal - Emerging Technology with demonstration programs
  - Hong Kong - Power Generation, Research and Government Support
- India:
  - Power Generation, EVs and Grid Stability
  - Energy Storage - Battery and Electro-Mechanical Major Storage Projects
  - Thermal - Emerging Technology with demonstration programs
- South Korea:
  - LIB and ESS Companies and Government Strategy
  - Some of the largest energy storage projects
- Thailand:
  - Power Generation, EVs and Grid Stability
  - Some large energy storage projects
- Vietnam:
  - Power Generation, EVs and Grid Stability
  - Some recent energy storage projects
- Indonesia & Asean:
  - Power Generation, UPS and Renewables
  - Power Generation, Growing Industries
  - BESS in early stages

**🔗 Key takeaways.....172**
